

Hose

Description

Dasic Marine's range of Layflat and Rigid Hose has been introduced to compliment the wide range of Dasic products from Tankwashing machines to Gas Freeing Fans. Our Layflat is manufactured with a fully woven polyester reinforcement and completely encapsulated with a thermoplastic elastomer (polyurethane), the hose provides high pressure capabilities together with excellent resistance to attack by fuels, chemicals, abrasions, weathering and ozone/u.v. Two low resistance stainless steel bonding wires are incorporated against the build up of static electricity. Rigid rubber can be supplied. Fully assembled hose can be supplied with pressure test certificate and continuity certificates if applicable.

Range of Specifications Available

- Layflat - 1½", 2", 3"
- Reinforced rubber - 3", 4"
- Rigid Polypropylene - 2", 3"

Typical Applications

- Tankwashing - all of range
- Gas Freeing - all of range
- Pumping
- Fluid Handling
